

Are you getting the *highest* ROI from your Software?

Do your users have continued reliance on *Manual Processes*?

Is there an *Ineffective* Use of Computing Resources?

Are users increasing *Quantitative* tasks while reducing *Qualitative* output?

Have you been *recently* implemented or a *long time* user of your package?

Do you want the same company that created the programs, auditing them?

Has there been *turnover* in your departments since your last formal training?

## Post Implementation Audit (PIA) !!!

**Synthasys will :**

- ✓ Review your Business requirements
- ✓ Review your current Policies and Procedures
- ✓ Review your current System setup
- ✓ Review your current data
- ✓ Review Integration points
- ✓ Review current reporting
- ✓ Interview Key users of the system
- ✓ Create Audit report
- ✓ Issue Audit findings
- ✓ Provide Recommendations
- ✓ Recommend Next steps

When your PIA is complete, you will be ready to utilize your software modules to their highest capacity, matching your Enterprise needs with precise policy, procedure and software use.
