

Are you taking advantage of the latest releases of your Infinium modules?

Is time running out on product support of your old version?

Let Synthasys assist your organization to upgrade to current releases!

Why upgrade?

- ✓ Take advantage of the latest software functionality
- ✓ Ensure compliance with regulatory requirements
- ✓ Ensure continuity of vendor product support
- ✓ Ensure integration with upgrades of other modules

How can Synthasys help?

- Integrate your customizations made to Infinium source code into the upgraded version
- Analyze your custom programs which integrate into the old versions
- Ensure product upgrades will continue to interface with your existing custom programs
- Assess hardware and DASD requirements
- Ensure co-existence with other existing versions of Infinium Software modules
- Update necessary AM controls and validate continuity of menu controls and security
- Perform Post-upgrade testing to ensure error free processing

If you would like a FREE proposal of how Synthasys can assist with your Infinium upgrades, give us a call today! 877-717-5602
